

Curtis Loop

San Bernardino, California | curtis-loop-cyber-portfolio.seventhree170.chatgpt.site | github.com/stuffthings15 | dev.to/stuffthings15 | credly.com/users/curtis-loop | credential.net/profile/curtisloop942540/wallet

Cybersecurity student and software product builder creating practical, privacy-aware tools for Windows, Android, Wear OS, and browser workflows. Ships complete products: local-first AI systems, encrypted data handling, packaging, installers, release verification, and marketplace-ready deliverables. Campus leader heading two student organizations and serving as treasurer of a third.

EXPERIENCE

Software Product Builder - Self-employed | January 2025 - Present

- Independent software product work across Windows desktop, Android and Wear OS, and Chrome extensions; projects include BrickBlast, CITY//ZERO, Creator Studios, Manuscript, DreamSync, and Chrome Reader.
- Builds local-first AI features with on-device speech and language-model integration, resumable generation, and privacy-conscious data boundaries.
- Applies security in the architecture: SQLCipher encrypted storage, Windows DPAPI key protection, signed webhook verification, server-side entitlement validation, and path/export boundary checks.
- Delivers through Google Play Internal testing, PyInstaller/Inno Setup Windows packaging, and marketplace listings on Fiverr, Contra, Gumroad, and Payhip.

EDUCATION

San Bernardino Valley College - Associate's, Computer Information Technology | January 2025 - Present (expected May 2027)

- Dean's List - Highest Honors, Spring 2026 (3.90-4.00 GPA criterion)
- Dean's List - Highest Honors, Fall 2025 (3.90-4.00 GPA criterion)
- SBVC Foundation scholarship recipient, 2024-2025 academic year

CREDENTIALS AND RECOGNITION

- Cisco Introduction to Cybersecurity - Cisco Networking Academy, issued August 31, 2025
- Second Place, College Division, 2026 Inland Empire Mayors Cyber Cup - SynED (team competition, April 25, 2026)

LEADERSHIP

- President, SBVC Cybersecurity Club - coordinates meetings, activities, shared resources, and Inter-Club Council participation.
- President and Founder, SBVC eSports Club - initiated club formation; coordinated officer and advisor onboarding, travel planning, and faculty communication.
- Treasurer, SBVC WiCyS Chapter - supports chapter operations, financial coordination, and shared-resource stewardship.

SELECTED PROJECTS

- BrickBlast - cross-platform retro arcade game (VB.NET/.NET, WinForms, WPF, Avalonia, HTML5, Capacitor); public repo with releases Rev1-Rev5 and a completed full-history signing-key cleanup. github.com/stuffthings15/BrickBlast
- CITY//ZERO - original open-world game production package: Godot 4, C#/.NET, GDScript, JSON-driven systems, automated tests, CI. github.com/stuffthings15/CITY-ZERO
- Creator Studios / VEdit-AI - Windows desktop platform for creator operations: video editing, AI-assisted generation, voiceover and dictation, YouTube tooling, packaged installers.
- Manuscript - privacy-aware writing assistant for Windows and Android: accessibility-service text assistance, SQLCipher + DPAPI encryption, loopback-only model communication, Play Internal distribution.
- DreamSync - Android + Wear OS sleep-cue research prototype: cross-device Data Layer messaging, sensor diagnostics, conservative non-medical positioning.
- Chrome Reader - Manifest V3 extension: readable web content, speech controls, YouTube research packages with transcript recovery.
- Additional: Friday's Adventure II, Vine Helper, AI Brain, Phone Data Plus.

TECHNICAL SKILLS

- Security: cybersecurity fundamentals, basic cryptography, log analysis, network and traffic analysis, OSINT, operating systems, social engineering awareness, local-first privacy design
- Languages: Python, Kotlin, Java, C#, JavaScript, HTML, CSS
- Platforms and tools: PySide6, PyInstaller, Inno Setup, Android SDK, Wear OS, Godot 4, Chrome Manifest V3, Gradle, ADB, Git and GitHub CI, Ollama and local LLM integration, SQLCipher, Windows DPAPI
